

# Twinslot Shelving System

## Extendable Steel Shelving System

### Description

Twinslot Shelving system is E-32 compatible, allowing the user to extend their existing storage or giving them the flexibility to expand in the future. The strong steel construction and high load capacity make our twinslot range incredibly hard-wearing. Ideal for commercial use in retail, offices, and schools or personal use in the home.

### Product Features

- Element (E32) Compatible
- Anti-microbial finish
- 202 grade steel

### Shelf Specification

A wide range of shelf materials and colours are available, including MFC, MDF, HPL and SGL. Our standard offering is as below:

- 18mm MFC - Egger W980 ST2 'Platinum White'
- Matching 1/2mm ABS edging
- Cut to size, maximum of 500mm between uprights.
