

Polycarbonate Mirrors

High impact and fire resistant

Description

Our Polycarbonate mirrors are virtually unbreakable. This product is approximately 200 times stronger than glass.

Polycarbonate is used where high impact and fire resistance properties are essential.

Available 6mm thick. These mirrors are manufactured from high quality polycarbonate with a scratch resistant coating as standard to improve abrasion resistance.

Colours

- Silver mirror

Sizes (mm)

Part No.	Description	Width	Height	Thickness
MP9030	Rectangular Inc. 4 Holes, safety backing, screws, caps and grommets, scratch resistant coating	900	300	6
