

# Carbon Reduction Plan

**Supplier name:** Medspace Solutions Limited

**Publication date:** 06-09-24

## Commitment to achieving Net Zero

Medspace Solutions is committed to achieving Net Zero emissions by 2040

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline year:</b> 2024

## Emissions Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease by 50% over the next five years.

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

As we have just begun our Net Zero journey we have not yet implemented any additional Carbon Reduction Initiatives. However the following are in place:

- Solar panels on the factory roof reducing our reliance on fossil fuels
- Implementation of a waste to heating system
- Usage of electric vehicles

In the future we hope to implement further measures such as:

- Implement energy-efficient technologies, such as LED lighting, smart thermostats, and energy-efficient HVAC systems
- Purchase electricity from certified renewable energy sources for all operations
- Transition to electric vehicles (EVs) for all company-owned vehicles

- Provide incentives for employees to use public transportation or carpool, and encourage remote work to reduce commuting emissions
- Implement a company-wide waste management program aimed at achieving zero waste to landfill by through recycling, composting, and reducing single-use plastics.
- Prioritise suppliers with strong environmental practices and reduce the carbon footprint of our supply chain

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions will be reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[1] and uses the appropriate Government emission conversion factors for greenhouse gas company reporting[2].

Scope 1 and Scope 2 emissions will be reported in accordance with SECR requirements, and the required subset of Scope 3 emissions will be reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard[3].

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

### Signed on behalf of the Supplier:

A handwritten signature in blue ink, appearing to read "S Wolf".
