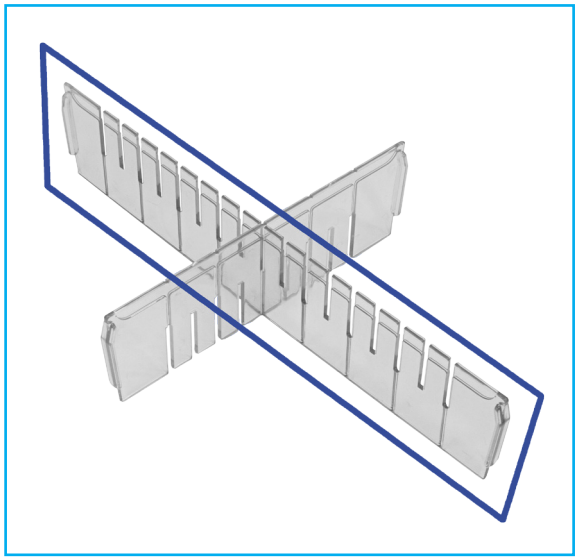
PRODUCT DATASHEET

CLEAR100LD

100mm HTM71 Tray Length Divider



Description
100mm deep HTM71 tray length divider made from clear ABS for use within 100mm HTM71 tray.

The injection molded trays are high quality, durable, light, hygienic and extremely strong.

Features
The key component to the HTM71 system is the 600mm x 400mm tray. All HTM71 capable systems can receive and use the tray. This could be cabinets, shelving or mobiles / trolleys.

The tray sits within the cabinet liner and arrester clips are used to stop the tray leaving the cabinet unintentionally.

A major benefit of the HTM71 system is the ability to label and compartmentalise each individual tray. The labels can be used for product indentification, colour coding or a combination of both.
