

CLEAR200H

HTM71 Tray

Description

200mm deep half-size HTM71 tray made from clear ABS for use within HTM71 furniture.

The injection molded trays are high quality, durable, light, hygienic and extremely strong.

Features

The key component to the HTM71 system is the 600mm x 400mm tray. All HTM71 capable systems can receive and use the tray. This could be cabinets, shelving or mobiles / trolleys.

The tray sits within the cabinet liner and arrester clips are used to stop the tray leaving the cabinet unintentionally.

A major benefit of the HTM71 system is the ability to label and compartmentalise each individual tray. The labels can be used for product identification, colour coding or a combination of both.
